

Efficient body planning through digital know-how

HOW ICARUS OPTIMIZED THE BODY PLANNING PROCESS WITH SOFTWARE TRAINING

At the core of automotive manufacturing was the challenge of making the body planning process more efficient. Proven planning processes were re-examined to fully exploit the potential of Process Designer and Process Simulate software. The main goal was to empower project teams to use the new tools independently through targeted skills training.

Objective

- Ensuring the transfer of knowledge for independent use in everyday planning
- Increasing software acceptance through accompanying measures
- Integration of the software into operational operations

Proceed

- Comprehensive training from basic to advanced content
- Individual support and on-site assistance at project start
- Regular consultation hours and in-depth workshops

Result

- Ensured independence of all course participants
- Successful integration of the software into daily business
- High acceptance of the software through accompanying change process

"I don't have any questions right now. I just wanted to say thank you for your intensive care. It couldn't have gone better."
